

Budget-Friendly BMW E92 Brake Kit Research Report

Research target: budget-friendly brake service options for BMW 3 Coupe E92

Primary markets/sources reviewed: Trodo.lv and Eparts.lv product listings; Intercars.lv yielded no useful E92 kit pages in the summarized research.

Executive finding: The available research did not identify a broad selection of true boxed “complete brake kits” for the BMW E92. Latvian catalog results mainly separate the job into *bremžu uzliku komplekts* / brake pad sets, *bremžu diski* / brake discs, pad accessory kits, and wear sensors. For a budget-friendly E92 brake refresh, the practical approach is to assemble a kit from compatible separate components after confirming the exact engine, axle, brake system, and rotor dimensions.

1. User Requirement and Fitment Assumption

The original request was: “**budget friendly E92 brake kit.**” The research results treat “E92” as the **BMW 3 Series Coupe E92**, sold approximately in the 2005–2013 generation and sharing many brake catalog listings with related E90/E91/E93 models.

The request implies three practical requirements:

- **Budget-oriented pricing**, not premium or performance-only components.
- **Kit-style purchase**, ideally pads plus rotors, but the research shows most catalogs list components separately.
- **Correct E92 fitment**, which is dependent on engine variant, axle, brake system, and disc size.

Fitment caution: The summarized results repeatedly show that BMW E92 brake parts vary by front/rear axle, engine variant, brake system such as ATE/Teves, Lucas/TRW, Sumitomo or Brembo, and disc size. The exact E92 model was not specified by the user, so no product in this report should be purchased without vehicle-specific confirmation by VIN, engine, year, axle, brake system, and rotor dimensions.

2. Catalog Terminology and Search Methodology

The research found that Latvian catalog terminology is more effective than the English phrase “brake kit.” The strongest recurring terms were:

- **Bremžu uzliku komplekts** — brake pad set / pad kit
- **Bremžu kluči** — brake pads
- **Bremžu diski** — brake discs / rotors
- **Disku bremžu piederumi** — disc brake accessories
- **Piederumu komplekts, Disku bremžu uzlikas** — pad fitting or accessory kit
- **Nodiluma devēji** — wear sensors

- **Bremžu komplekts, Disku bremzes** — disc brake kit

Useful search phrases identified by the research include:

- BMW 3 Coupe E92 bremžu uzliku komplekts
- BMW E92 bremžu diski
- BMW E92 disku bremžu piederumi
- Piederumu komplekts disku bremžu uzlikas BMW E92
- Model-specific variants such as BMW 3 Coupe E92 320 i bremžu... or 328 i bremžu...

3. Complete Kit Availability

The research found very limited evidence of full rotor-and-pad kits. Most listings are individual components. One relevant listing was identified on Trodo:

Listing Type	Brand / Part	Contents Reported	Known Details	Budget Suitability	Source
Combined disc brake kit	MAPCO 47873HPS	MAPCO brake discs, MAPCO brake pad set, wear indicator	Listed as “Bremžu komplekts, Disku bremzes.” Exact E92 variant, axle, price, and detailed specifications were not provided in the summarized research.	Potentially useful if confirmed for the exact vehicle, but insufficient data to recommend over individual confirmed components.	Trodo MAPCO 47873HPS

Because true full kits were not consistently available, the best budget strategy is to build a service package from separate components: front pads, rear pads if required, front/rear discs as needed, wear sensors, and pad accessory kits.

4. Budget-Relevant Brake Pad Options Found

The most concrete budget findings are front axle brake pad sets. These are useful if the user's immediate need is front brakes or if building the front half of a brake kit. Rear pad results were also found, but less pricing detail was available in the summarized findings.

Brand / Part Number	Axle	Brake System / Fitment Notes	Dimensions / Technical Details	Price / Availability	Assessment	Source
ABE C1B050ABE	Front	ATE system; listed for BMW 3 Coupe E92 compatibility in Eparts result.	155.1 × 68.3 × 20.3 mm; set of 4 pads.	€26.66 ; available.	Strongest budget pad candidate found due to low price, availability, and clear front-axle/ATE details. Must confirm against exact E92 brake package.	Eparts ABE C1B050ABE

Brand / Part Number	Axle	Brake System / Fitment Notes	Dimensions / Technical Details	Price / Availability	Assessment	Source
ABE C1B026ABE	Front	ATE system; BMW OE reference reported as 34116780711.	153.3 × 68.5 × 19.8 mm.	€28.33.	Another strong budget front pad option, but dimensions differ from C1B050ABE, reinforcing the need for exact fitment verification.	Trodo ABE C1B026ABE
LPR 05P1509	Front	Listed for BMW 3 Coupe E92 compatibility.	Specific dimensions not included in summarized research.	Reported in a range of roughly €31–€64 for front pad options, depending on brand and tier; exact price for this item not specified in the summary.	Potential budget/ mid-range alternative if it matches the exact vehicle.	Trodo LPR 05P1509
COMLINE CBP02011	Front	Listed among compatible E92 pad options.	Specific details not included in summarized research.	Included in the approximate €31–€64 front pad range; exact price not specified.	Possible budget pad candidate, but less concrete data was available than for the ABE options.	Trodo E92 brake category result
TRW GDB1559	Front	ATE system.	Specific dimensions not included in summarized research.	€47.21.	More expensive than ABE but from a well-known braking supplier. A sensible mid-tier option if the budget allows and fitment is confirmed.	Trodo research result context
Brembo P 23 144	Front	Identified via Eparts OE search for BMW front axle applications.	Specific dimensions not included in summarized research.	Approximately €44–45.	Mid-tier rather than cheapest. Worth considering where brand preference matters more than minimum cost.	Eparts OE search context
Febi Bilstein 16716	Front	Identified via Eparts OE search for BMW front axle applications.	Specific dimensions not included in summarized research.	Approximately €44–45.	Mid-tier front pad option; not the most budget-focused option found.	Eparts OE search context

5. Brake Disc / Rotor Options Found

Disc data was less complete for budget front rotors. The research found some E92-compatible disc listings, but at least one promising budget front disc was unavailable, and some other discs were performance-oriented rather than budget-oriented.

Brand / Part Number	Axle / Position	Construction / Specification	Price / Availability	Assessment	Source
Trucktec Automotive 08.35.226	Front	Internally ventilated; 26 mm thickness; OE reference 34 11 6 778 647; compatible with BMW 3 Coupe E92 in the Trodo result.	€47.51 ; marked unavailable.	Attractive budget reference price, but not a practical purchase if still unavailable. Useful as a benchmark for similar budget front discs.	Trodo Trucktec 08.35.226
AIC 53442	Not specified in summary	Brake disc compatible with BMW 3 Coupe E92/E90/E91/E93/X1 according to Trodo result.	Price and availability not provided in summarized research.	Potential budget disc candidate, but insufficient price/specification data to recommend directly.	Trodo related result context
Zimmermann 150.3437.52 Sport Brake Disc Coat Z	Rear	Internally ventilated and drilled; premium category; compatible with BMW 3 Coupe E92.	€93.19 each.	Not budget-first, but a confirmed rear sport disc option. More relevant for performance appearance/feel than lowest-cost service.	Eparts Zimmermann 150.3437.52
SHW Performance BFR42852	Right front; paired with BFL42851	Drilled, internally ventilated, two-piece, 360 mm diameter, 30 mm thick, coated/high-carbon, ECE R90 approved.	€278.04 ; available.	Clearly outside a budget-friendly build. Included only to show that performance disc results exist but do not fit the stated budget priority.	Trodo research result context

6. Rear Pad and Performance-Oriented Results

Rear pad options were found, including FREMAX FBP-1624, LPR 05P1252, COMLINE CBP06072, and EBC Brakes DP41588R. However, the summarized research does not provide the same level of price and specification detail for these as it does for the front ABE options. Therefore, they should be treated as leads to verify rather than final recommendations.

Several premium or sport-oriented parts also appeared:

- **Brembo HP2000 / Upgrade Sport 07.B314.82** front pad set: available on Trodo at €110.60, premium category, WVA 24096.

- **Brembo Xtra Line P 06 037X** rear pad set: rear axle, premium category, with accessories/caliper bolts/pressure plate, €60.08.
- **Zimmermann 150.3437.52** rear sport disc: drilled, internally ventilated, €93.19 each.

These are not the best match for a budget-friendly brief unless the user specifically wants sport pads or drilled discs and accepts the higher cost.

7. Ceramic Brake Kit Finding

No clear E92 ceramic kit found: The research found no clear full “ceramic brake kit” for BMW 3 Coupe E92 on the searched domains. One Brembo result mentioned “XTRA LINE – Ceramic,” but it appeared tied to other BMW models such as X4 and was not clearly confirmed for E92. For this reason, a ceramic E92 kit cannot be recommended from the supplied research.

8. Accessories and Wear Sensors

The catalogs separate hardware from pads and discs. If building a practical brake kit, the buyer should check whether the selected pad set includes hardware or whether separate fitting kits and wear sensors are needed. Accessory kit examples found for E92 front pads include:

Part / Brand	Type	Price Range Found	Notes
Autofren Seinsa D42477A	Pad accessory / fitting kit	Approximately €2.63–€5.85 range for accessory kits found	Confirm axle and caliper compatibility.
Quick Brake 109-1097	Pad accessory / fitting kit	Approximately €2.63–€5.85 range for accessory kits found	Quick Brake hardware also appeared in Eparts results.
Bosch 1 987 474 154	Pad accessory / fitting kit	Approximately €2.63–€5.85 range for accessory kits found	Verify against caliper type and axle.

9. Practical Budget Package Direction

Best budget direction from the available evidence: Build a vehicle-specific kit from separate components rather than searching only for a single boxed “brake kit.” Start with a confirmed low-cost pad set such as ABE C1B050ABE or ABE C1B026ABE if the vehicle uses the matching front ATE setup, then pair it with compatible standard, internally ventilated front discs from the same catalog after filtering by exact E92 variant and disc dimensions. Add wear sensors and fitting hardware as required.

Recommended buying sequence

1. **Identify the exact E92:** model designation, engine, production year/month, and preferably VIN.
2. **Confirm axle and brake system:** front or rear; ATE/Teves/Lucas/TRW/Brembo/Sumitomo as applicable.

3. **Measure or verify rotor dimensions:** diameter and thickness are critical because E92 variants use different brake sizes.
4. **Select pads:** for lowest confirmed front-pad cost, compare ABE C1B050ABE at €26.66 and ABE C1B026ABE at €28.33 against your vehicle fitment.
5. **Select discs:** find available standard discs matching the same axle and brake package. The Trucktec 08.35.226 listing gives a budget price reference but was unavailable in the research.
6. **Add wear sensor and hardware:** especially if the existing sensor has triggered a brake warning or if the pad set does not include all required accessories.

10. Decision Summary

Purchase Goal	Best Research-Supported Direction	Reason
Lowest-cost front pad replacement	ABE C1B050ABE or ABE C1B026ABE, if exact fitment matches	Both are low-cost front ATE pad sets with concrete prices; C1B050ABE is reported available at €26.66, while C1B026ABE is €28.33.
Budget front disc plus pad service	Separate pads plus separate standard discs after vehicle filtering	True kits were scarce; budget disc data was incomplete and one low-cost Trucktec disc was unavailable.
Full car brake kit	Build separate front and rear packages: pads, discs, sensors, hardware	Catalogs split front/rear pads, discs, wear sensors, and accessories rather than offering a universal full kit.
Ceramic kit	No recommendation from supplied research	No clear full ceramic brake kit was confirmed for BMW 3 Coupe E92.
Performance upgrade	Brembo HP2000/Xtra pads or Zimmermann Sport rear discs, if budget allows	These are confirmed premium/sport-oriented results, but they conflict with a strict budget-friendly brief.

11. Final Recommendation

For a budget-friendly BMW E92 brake service, do not rely on the English phrase “brake kit” alone. Use the Latvian catalog terms for brake pads, discs, accessories, and wear sensors, then assemble a kit that matches the exact vehicle.

The most actionable budget choice found is a **front pad set from ABE**, specifically **ABE C1B050ABE** at €26.66 if the car uses the matching ATE front setup, or **ABE C1B026ABE** at €28.33 if its dimensions and OE references match the car. For rotors, the research did not surface a clearly available low-cost front disc with enough detail to recommend as the final choice; the unavailable Trucktec 08.35.226 at €47.51 is useful only as a price benchmark. The buyer should filter Trodo or Eparts by exact E92 variant and choose compatible standard discs rather than drilled or two-piece performance discs if cost control is the priority.

If the goal is a complete front or full-car refresh, the minimum practical shopping list is:

- Front brake pad set matched to the brake system and pad dimensions
- Front brake discs matched by diameter/thickness and axle

- Rear pads and rear discs if doing all four corners
- Wear sensor or sensors where required
- Pad accessory/fitting kit if not included with the pads
